UNITED STATES PATENT OFFICE.

DAVID R. GOUDIE, OF LONDON, ONTARIO, CANADA.

CHILD'S MONEY BANK OR BOX.

SPECIFICATION forming part of Letters Patent No. 282,978, dated August 14, 1883.

Application filed February 21, 1883. (No model.)

To all whom it may concern:

Be it known that I, DAVID ROY GOUDIE, of the city of London, in the Province of Ontario, Canada, a subject of the Queen of Great Britain, have invented certain new and useful Improvements on Children's Money Banks or Boxes; and I do hereby declare that the following is a full, clear, and exact description of the same, such as will enable others skilled in the art to which it appertains to make and use the same.

My invention consists of a money-box the front of which is glazed and the interior shaped to contain two small mirrors placed angularly, so as to reflect many times the contents, consisting of money, and also a picture placed at the bottom.

In the accompanying drawings of my invention, Figure 1 is a front view. Fig. 2 is a perspective view. Fig. 3 is a horizontal section.

A is the box, constructed to contain a pair of small mirrors, B C, placed angularly to one another. D is the lid or covering-plate, and *a* the slit for receiving money. E is a plate of glass covering the front. On the bottom F of this box a picture will be placed as an embellishment. The angularly-disposed mirrors B C will reflect and refract the rays, so that the money will appear many times multiplied, together with the picture at the bottom, producing a very ornamental effect.

I claim as my invention—

The above-described child's multiplying money-box, consisting of a box containing a pair of small mirrors, B C, placed angularly to one another, in order to reflect the rays and apparently to multiply the contents, and in combination therewith the front glass, E, and picture at bottom, F, substantially as shown and described.

DAVID ROY GOUDIE.

Witnesses:

HENRY BEECH,

S. H. GRAYDON.
