(54) Title: A MEDICAL APPARATUS FOR LOCATING BLOOD VESSELS IN AN UPPER LIMB OF A USER

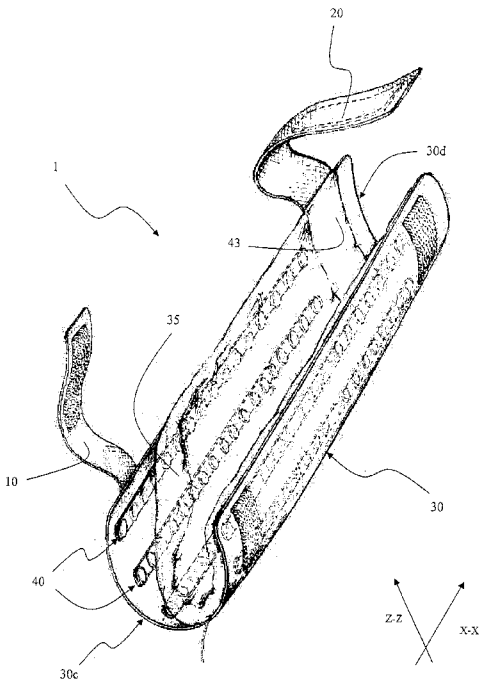

Fig.l

(57) Abstract: The present invention relates to a medical apparatus (1) for locating blood vessels in the upper limb of a user, comprising distal attachment means (10) which are designed to be reversibly attached to said upper limb substantially at the forearm of said user 5and proximal attachment means (20) which are designed to be reversibly attached to said upper limb substantially at the arm of said user. The apparatus (1) is equipped with a main body (30) connected to the distal and proximal attachment means (10, 20) adapted to support lighting means (40) for the light radiation emitted therefrom to be at least partially directed towards said upper limb between the forearm and the lOarm of said user.
