THE NORRIS PETERS CO., PHOTO-LITHO., WASHINGTON, D. C.

UNITED STATES PATENT OFFICE.

WILLIAM VITZTHUM, OF HOBOKEN, NEW JERSEY, ASSIGNOR TO MAX KATZENBERG, G. GARSON FREUND, AND MAX FREUND, OF NEW YORK, N. Y.

DESIGN FOR A BELT-BODY OR SIMILAR ARTICLE.

SPECIFICATION forming part of Design No. 34,049, dated February 5, 1901.

Application filed September 13, 1900. Serial No. 29,970. Term of patent 3½ years.

To all whom it may concern:

Be it known that I, WILLIAM VITZTHUM, a citizen of the United States, residing at Hoboken, county of Hudson, and State of New Jersey, have invented and produced a new and original Design for Belt-Bodies, of which the following is a specification.

My invention relates to belt-bodies; and the essential feature of said invention resides in the shape and configuration of the article herein shown and described.

In the drawings forming part of this specification, Figure 1 is a side elevation of the belt-body extended out, and Fig. 2 a side elevation of the belt when disposed about the body of a wearer.

The body comprises three sections as to shape or configuration—to wit., the central section 1 and the end sections 2 3, the central section being deeper, while the end sections curve upwardly above the plane of the lower edge of the central section. The upper concave edge 4 of the central section is on a larger arc or segment of a circle than is the lower edge 5 of said central section, and the ends 2 and 3 are gradually reduced in width as they near their termini, as clearly illustrated in Fig. 2.

Having described my invention, I claim—

The design for a belt-body or similar article, substantially as herein shown and described.

Signed at the city, county, and State of New York this 7th day of September, 1900.

WILLIAM VITZTHUM.
