DESIGN.

F. J. KALDENBERG.
Umbrella Handle.

Patented April 22, 1879.
UNITED STATES PATENT OFFICE.

F. JULIUS KALDENBERG, OF NEW YORK, N. Y.

DESIGN FOR AN UMBRELLA-HANDLE.

Specification forming part of Design No. 11,172, dated April 22, 1879; application filed March 19, 1879.
[Term of patent 7 years.]

To all whom it may concern:

Be it known that I, F. JULIUS KALDENBERG, of New York, in the county and State of New York, have invented a new and original Design for the Handles of Parasols and Umbrellas, of which the following is a full, clear, and exact description, reference being had to the accompanying drawing, illustrating the same.

The invention is designed to produce an elegant and novel form for the handles of umbrellas, &c., by combining together representations of archery implements; and it consists, first, in giving to the body of the handle the outline or configuration of a quiver with its shoulder band or string placed thereon in appropriate ornamentation; second, in surmounting such handle with a bunch or cluster of feathered arrow-heads; third, in ornamenting the handle with a circular disk, provided on its face with a series of lines, figures, &c., to represent a target.

In the accompanying drawing, A is the body of the handle, whose exterior outline a a, &c., is made to conform to the shape of a quiver. Ornamental bands, dots, or curved figures in relief may surround the top and tapering portion of the handle, to give it a more beautiful and artistic appearance.

B is an ornamental chain-band, fastened to and entwined around the handle, representing the quiver shoulder-string. This band may be plain or ornamented, and of gold, silver, or other metal or color, selected to contrast strikingly with the handle.

Surmounting the handle is a bunch or cluster of feathered arrow-heads, C; the handle thus presenting the appearance of a quiver filled with arrows. The arrow-heads may be of ivory or metal, or of the same or a different material and color from the handle, as I do not consider the material or color selected an essential element of my design.

D is a circular disk, of material ornamental in appearance, placed upon the handle, having on its face a series of circle-lines, e e e, and arbitrary figures 1 2 3 4, and a central bull's-eye, &c, preferably of metal, for greater ornamentation, the same representing a target with appropriate symbols.

I claim—

1. The design for an umbrella or parasol handle, consisting of the representation of an arrow-quiver with the quiver-string entwined around it, substantially as described, and shown in the accompanying illustration.

2. The design for an umbrella or parasol handle, consisting of the representation of a bunch of feathered arrow-heads on the top of the handle, substantially as described, and shown in the accompanying illustration.

3. The design for an umbrella or parasol handle, consisting of the representation of a target placed upon the handle, substantially as described, and shown in the accompanying illustration.

4. The design for an umbrella or parasol handle, consisting of the representation of a quiver with a bunch of feathered arrow-heads therein, a target upon one side, and a quiver-string entwined around it, substantially as described, and shown in the accompanying illustration.

F. J. KALDENBERG.
