(54) Title: ADAPTABLE PROGRAMMING GUIDE FOR NETWORKED DEVICES

(57) Abstract: An electronic content guide is disclosed. The electronic content guide preferably includes a source field for listing content sources and output devices. The electronic content guide also includes a first content field for listing schedule data corresponding to first content data presently available for viewing from each one of the content sources and for listing display information corresponding to the first content data being displayed for viewing at a present time by each one of the output devices. Preferably, the source field and the first content field are displayable in parallel columns. The electronic content guide can also include a second content field, displayable in a column parallel to the source field and the first content field, corresponding to a second content data. In one embodiment, the first content data from each content source can be displayed simultaneously on more than one of the output devices.

INTERNATIONAL SEARCH REPORT
