- (54) **Title:** METHOD AND SYSTEM FOR A GRASS ROOTS INTELLIGENCE PROGRAM
- (57) **Abstract:** A system for gathering and assessing intelligence information comprises a credibility filter configured to assign a credibility value to intelligence information sent from a user. A data warehouse is coupled to the credibility filter and the data warehouse is configured to store intelligence information from the user. A predictive query engine is coupled to the data warehouse. The predictive query engine is configured to query the data warehouse to determine potential threat data. The predictive query engine is also configured to store the potential threat data in the data warehouse. An alert poller is also coupled to the data warehouse. The alert poller is configured to receive the potential threat data and compare the potential threat data to one or more comparison factors pre-selected by the user.
