# UNITED STATES PATENT OFFICE.

DAVID J. WILLIAMS, OF PROVO, UTAH.

COMBINED DIRECTORY AND INDEX.

933,281.

Specification of Letters Patent.

Patented Sept. 7, 1909.

Application filed July 7, 1904. Serial No. 215,668.

*To all whom it may concern:*

Be it known that I, DAVID J. WILLIAMS, a citizen of the United States, residing at Provo city, in the county of Utah and State of Utah, have invented a new and useful Combined Directory and Index, of which the following is a specification.

This invention relates to a combined index and directory especially designed for use in connection with the investment and savings system disclosed in my United States Patent No. 762,855, dated June 14, 1904.

The object of the invention is to provide a book the pages of which are arranged in sets, the pages of the two sets alternating and one set having data arranged thereon for indicating business and professional callings, and the pages of the other set being provided with data indicating merchandise and services which may be obtained.

Another object is to provide an arrangement such as above set forth and in which the data on each page of one of the sets is readable with the data on the opposed facing page of the other set, there being an index provided for each set of pages, both of the indexes being arranged upon one set of tabs extending beyond the margins of the pages.

With these and other objects in view the invention consists of certain novel details of construction and combinations of parts hereinafter more fully described and pointed out in the claim.

In the accompanying drawing, the preferred form of the invention has been shown, said drawing being a plan view of the book open to show the two opposed pages.

Referring to the drawing it will be seen that the present instrument embodies the usual front and back cover members 1 and 2 which may be provided with suitable page numbers as for example, 2 and 189 respectively. At the top of page 2 is any appropriate heading or title according to the character of the directory, as for instance, "Follow Investment Co.," and the word "Directory." Below this heading or title is suitable matter pertaining to the general subject of the book.

The pages appearing at the right of the book when open are designed to contain data relating to business or professional callings, the page appearing at the left of the open book being designed to contain a list of

merchandise or of services obtainable from the person or persons listed upon the right-hand page. The pages are provided with tabs 5 extending from their side edges, these tabs being provided on one side with data referring to the matter appearing on the pages arranged to be exposed at the right of the book while the other sides of the tabs contain data referring to the matter contained on the pages arranged to be exposed at the left of the book. For example, and as shown in the drawings, page 53 is provided with a tab 5 on which the word "Druggist" appears. Page 53 does not extend to the upper and lower edges of the book but is comparatively short and has thereon the names of persons or firms, together with their addresses, these persons and firms being engaged in the drug business. Certain other pages of different lengths appear above and below page 53 and the exposed portions of these other pages have names and addresses of persons engaged in other businesses or professions but which, as well as those indicated on page 53 are also engaged in the sale of the articles itemized upon the tab on the page appearing at the left of the book. It will be seen that the tab of this page, which in the present instance, is numbered 52, has thereon the names of several remedies all of which can be bought of the firms or persons whose names appear upon the exposed portions of the pages at the right of the book. The two pages 52 and 53 may be provided with columns in which matter of an advertising nature may be printed. It will be seen therefore that by providing an arrangement of data and indexes such as herein described a list, for example, of all druggists can be readily located simply by opening the book at the tab on which the word "Druggist" appears. On the opposite page of the book thus exposed will appear the names of special drugs and medicines which may be obtained from the druggists whose names appear upon the right-hand page. Then again, should it be desired to ascertain the names of the persons engaged, for example, in the sale of "Fig syrup" it is merely necessary to open the book at the tab on which the words "Fig syrup" appear and the page from which the tab extends will be found to contain certain advertising matter with relation thereto while the opposite page, to wit, the page at the right of the book, will contain

the names of the person or persons engaged in the sale of the medicine. If parties engaged in other callings than that of the drug business, are also engaged in the sale of the medicine, their names will appear above or below the page 53, all of the pages being so shaped and proportioned as to permit desired parts thereof to be exposed in this manner.

10 Having thus described the construction and operation of my invention, what I claim as new and desire to secure by Letters-Patent is:—

15 A book having data upon the leaves thereof relating to business and professional callings and merchandise and services obtain-

able, said book having marginal tabs upon the leaves thereof, said tabs being indexed on one side to indicate business and professional callings, and on the other side to indicate merchandise and services obtainable, the said indexes bearing reference to the data upon the corresponding faces of the leaves from which they extend.

In testimony that I claim the foregoing as my own, I have hereto affixed my signature in the presence of two witnesses.

DAVID J. WILLIAMS.

Witnesses:

PHIL. SPECKERT,  
J. F. FARRER.
