(54) Title: METHOD AND SYSTEM FOR ELECTRONIC MAIL DEPLOYMENT

(57) Abstract: A system for electronic mail message deployment on the Internet. A message is sent over an electronic mail network. When read by an electronic mail client, the message brings in content over an electronic content network. The content is displayed by the electronic mail client. The message may be composed of either a script which brings in the content or a script which invokes an applet to bring in the content. The script or applet may bring in the content by either requesting the content from a content server or invoking a servlet on a content server. The script or applet may also have an interactive component which may be used to collect information from the recipient.

° Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
