Inventor:

B. Levy

United States Patent Office.

BERNHARD LEVY, OF BOSTON, MASSACHUSETTS, ASSIGNOR TO
HIMSELF AND WILLIAM H. SLOCUM, OF SAME PLACE.

Letters Patent No. 95,240, dated September 28, 1869.

IMPROVEMENT IN MUFFS.

The Schedule referred to in these Letters Patent and making part of the same.

To all whom it may concern:

Be it known that I, BERNHARD LEVY, of Boston, in the county of Suffolk, State of Massachusetts, have invented certain new and useful Improvements in Muffs; and I do hereby declare that the following is a full and exact description thereof, reference being had to the accompanying drawings, and to the letters of reference marked thereon.

The nature of my invention consists in so lining a lady's muff that it shall form two separate and distinct apartments for the hands, each closed at one end so as to form pockets or mittens, by which arrangement the comfort of the wearer is greatly enhanced. The pockets thus formed also serve as receptacles for small articles, such as portemonnaies, &c.

To enable others skilled in the art to make and use my invention, I will proceed to describe its construction and use.

Drawings.

Figure 1 is a perspective view of my improved muff.

Figure 2 shows the same in section.

The exterior of my muff is made in the usual manner, and may be varied in all of the usual styles to suit the trade.

The interior of my muff is constructed as shown in fig. 2. It has really two complete linings, an exterior lining A A' B B', and an interior lining, A C B' A D B'.

Two folds of the interior lining are stitched on to the exterior at one end, as shown at B', while the other ends of the same folds are stitched on to the exterior lining at the other end, as shown at A, so that two complete mittens or pockets are formed.

I do not confine myself to the particular manner of arranging the interior linings, but wish to claim, as new, the idea of dividing the interior into two compartments diagonally, as shown.

Claim.

What I claim as my invention, and desire to secure by Letters Patent of the United States, is—

A lady's muff, when the interior is divided into two compartments, substantially as shown, and for the purpose set forth.

B. LEVY.
