(54) Title: INFORMATION DISPLAY APPARATUS HAVING AT LEAST TWO TOUCH SCREENS AND INFORMATION DISPLAY METHOD THEREOF

[Fig. 1]

(57) Abstract: A method and apparatus for displaying information on at least two touch screens are provided. The method includes sensing a first touch-drag on a first touch screen; sensing a first touch on a second touch screen; and displaying, on at least one of the first and second touch screens, information corresponding to the first touch-drag on the first touch screen and the touch on the second touch screen, if the touch-drag on the first touch screen and the first touch on the second touch screen are simultaneously sensed.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
