(54) **A header contact and a header connector for use therewith**

(57) A header contact fixes a header housing reliably and prevents separation or the like of a soldering part so as to secure a function of signal connection and enhance the electric reliability of a header connector. The header contact (110) is provided in the header connector (100) that is to be mounted on a surface of an object for mounting (B) having conductor pattern. This header contact (110) comprises a contacting part (112) which is to contact a socket contact (220) of a counterpart socket connector (200), and a first connecting part (113) and a second connecting part (114) which are to be soldered onto the conductor pattern (FP), (SP) of the object for mounting (B).

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 25 6883

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
