James Hanson Windham Maine

Letters Patent

To all to whom these presents shall come Be it known that I James Hanson of Windham County of Cumberland State of Maine have invented a new and important Machine for the manufacturing of butter and that the following is a full and just description thereof. The boards 2 feet 9 inches long high 9 inches wide these boards are placed 13 inches apart with a circular grooves upon the inside of the above described boards so as to receive a bord in the same said circular bord is confined in the groove above described by three boards placed at equal distances on the outside of each of said boards in side pieces and confined by three rods on each end of the machine passing through from bord to bord one rod passing through the center of the middle bord with four bottle boards attached that are so playing within said circular groove on the end of the aforesaid rod is attached a pinion of four inches in diameter at the end of said middle bord passes a shaft with a cog wheel on one end of sixteen in diameter for the purpose of working with the above described pinion upon the side of said cog wheel is placed another wooden wheel of two feet two inches in diameter near the circumference of said wooden wheel are placed five pins for the purpose of operating said machine

What I claim as my own invention and not previously known in the above described machine is the gearing that is attached and that operate said Machine A. B. said Machine has a cover of the top with a hole in the center for the purpose of admitting air

James Hanson
