DESIGN.

T. I. RANKIN.

HEATING STOVE.

(Application filed Aug. 9, 1901.)
UNITED STATES PATENT OFFICE.

THOMAS I. RANKIN, OF PHILADELPHIA, PENNSYLVANIA, ASSIGNOR TO ABRAM COX STOVE COMPANY, OF PHILADELPHIA, PENNSYLVANIA, A CORPORATION OF PENNSYLVANIA.

DESIGN FOR A HEATING-STOVE.

SPECIFICATION forming part of Design No. 35,219, dated October 22, 1901.
Application filed August 8, 1901. Serial No. 71,416. Term of patent 7 years.

To all whom it may concern:

Be it known that I, THOMAS I. RANKIN, a citizen of the United States, residing in Philadelphia, Pennsylvania, have invented and produced a certain new and original Design for a Heating-Stove, of which the following is a specification.

My design for a heating-stove is clearly illustrated in the accompanying drawing, which represents the stove in perspective.

The essential feature of the design is the ornamentation on the base, the body, and the cap of the stove.

H is the base of the stove, supported on suitable legs h. Each of the legs is ornamented by a double scroll, and in the front of the base is the ash-pit door h, in the form of an oval medallion, on which is a raised central rosette, and extending from the lower portion of this medallion toward each side of the base of the stove are ribbon-scrolls. The balance of the base of the stove is ornamented in keeping with the general design.

H is the fire-pot, having vertical ribs, and above the fire-pot is the body H of the stove. This body has a front section h, to which is hinged the fire-door h. The frame h has a scroll ornamentation on each side, and above the door is a curved name-plate.

On the upper portion of the door is a name-plate formed by four scrolls. The lower portion of the door has suitable damper-openings and is ornamented by two scrolls extending on each side and a small double scroll at the top.

Extending from the lower portion of the body H is an ornamental flange or apron h, and extending upward from each side of the base H are foot-rests h, ornamented in keeping with the ornamentation of the stove.

The cap H is made up of three sections, each section being ornamented with scroll-work, and mounted on the cap is a vase.

I claim—

The design for a heating-stove as herein described and as illustrated in the accompanying drawing.

In testimony whereof I have signed my name to this specification in the presence of two subscribing witnesses.

THOMAS I. RANKIN.

Witnesses:

WILL. A. BARR,
JOH. H. KLEIN.
