(54) Title of the Invention: **Methods of combining the detection of biomolecules into a single assay using fluorescent in situ sequencing**
Abstract Title: **Methods of combining the detection of biomolecules into a single assay using fluorescent in situ sequencing**

(57) The present disclosure provides methods that combine RNA fluorescent in situ sequencing (FISSEQ) with other molecular detection modalities, forming an integrated panomic detection platform. In various embodiments, the present disclosure provides systems and methods to prepare a biological sample to preserve the spatial relationships of biomolecules of interest within the biological sample for FISSEQ detection.
