HIS ATTY.

UNITED STATES PATENT OFFICE.

ORANGE O. OZIAS, OF DAYTON, OHIO.

DESIGN FOR A SCALE PLATFORM MEMBER.

SPECIFICATION forming part of Design No. 33,827, dated January 1, 1901.

Application filed July 6, 1900. Serial No. 22,766. Term of patent 14 years.

To all whom it may concern:

Be it known that I, ORANGE O. OZIAS, a citizen of the United States of America, residing and having my post-office address in Dayton, Ohio, have invented and produced a certain new and original Design for a Scale Platform Member; and I hereby declare that the following is a clear, full, and exact description thereof, reference being had to the accompanying drawings, in which like numerals refer to like parts.

In the drawings, Figure 1 illustrates a top plan view of a scale platform member formed in accordance with my invention and design, and Fig. 2 is a side elevation view thereof.

The leading or material feature of my invention and design consists of a rectangular member narrower on one end than the other

and lugs projecting different distances from opposite sides of said rectangular member and near the edges thereof.

In said drawings, 10 represents the rectangular member, 11 represents the narrow end thereof, and 12 and 13 respectively represent the lugs projecting different distances from opposite sides of said member 10 near the edges thereof.

What I claim is—

The design for a scale platform member, substantially as shown and described.

In witness whereof I have hereunto set my hand this 28th day of May, 1900.

ORANGE O. OZIAS.

Witnesses:

L. D. HELLER,
IRA C. KOEHNE.
