(57) Abstract: The present invention provides an isolated peptide comprising a Dombrock carrier molecule that contains either a Dombrock (a) antigen or a Dombrock (b) antigen. Further, the present invention provides a nucleic acid encoding a Dombrock carrier molecule or fragments thereof. Moreover, a nucleic acid encoding a Dombrock (a) antigen or fragments thereof is provided. The present invention also provides a nucleic acid encoding a Dombrock (b) antigen or fragments thereof. Kits comprising antibodies to either the Dombrock (a) antigen or the Dombrock (b) antigen are also provided. Moreover, kits comprising either the Dombrock (a) antigen or the Dombrock (b) antigen, and kits comprising nucleic acids that encode the Dombrock (a) antigen or the Dombrock (b) antigen are provided. Methods for detecting the Dombrock (a) antigen or the Dombrock (b) antigen, and methods for detecting antibodies specifically binding to the Dombrock (a) antigen or the Dombrock (b) antigen are provided.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *Z* document member of the same patent family
