(54) Title: SYSTEMS AND METHODS FOR PERSONALIZING TRANSACTION CARDS

(57) Abstract: A system for personalizing a plurality of transaction cards comprises an array of shells that are adapted to engage a sheet having a plurality of transaction cards. Each of the shells comprises an antenna adapted for transmitting data onto one of the cards. An orientation detector is used to determine the orientation of the sheet relative to the array of shells. A controller is used to direct operation of the antenna so that data may be recorded on the cards.
