54 Means for the protection of the lower edge of an inclined roof covered by scaly elements, like roof tiles.

57 The protection means are realised by the combination of a beam (12) of plastic or metal and a roof boarding protecting plate (11). The beam (12) replaces the lower tile lath of a usual roof boarding construction (1), and the protecting plate (11) protects the lower edge of the chip board roof boarding plate (4) against rain water.
