Barnabas Langdon
Letters Patent June 20, 1801

The Schedule referred to in these Letters Patent and making part of the same containing a description in the words of the said Barnabas Langdon himself of his improvement Being a Hydraulic Machine for raising water.

The Machine of which this is a description has with ease raised water to the perpendicular height of thirty seven feet and ten and one quarter inches and is considered as being competent to raise water to the double of that height and is calculated to raise water for domestic uses and by being enlarged in a just proportion may be competent to supply water to mills and other works which may require an increased quantity of Water. It may also by being enlarged with great utility and the saving of much labor supersede the use of ordinary pumps in large ships. Portland 19th January 1801. Subscribed & attested by the said Barnabas Langdon in presence of us)
