(54) Title: TRANSPORTABLE MODULAR CONFIGURATION FOR HOLDING PANELS

Fig. 8

(57) Abstract: A configuration (100), all components of which are man portable in some embodiments, for holding panels (10) to protect assets against external force and impacts from airborne projectiles. An open box-like stackable frame module (800) holds panels (10) along a side of the frame (800). Multiple frames (800) are connected to construct a protective barrier, such as a wall (1000). Frames (800) include provisions for connection in a vertical configuration (1000) so as to allow stacking of the frames (800) to increase the height of the barrier. A method of installing is also provided.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
