

# DEFENSIVE PUBLICATION

## UNITED STATES PATENT AND TRADEMARK OFFICE

Published at the request of the applicant or owner in accordance with the Notice of Dec. 16, 1969, 869 O.G. 687. The abstracts of Defensive Publication applications are identified by distinctly numbered series and are arranged chronologically. The heading of each abstract indicates the number of pages of specification, including claims and sheets of drawings contained in the application as originally filed. The files of these applications are available to the public for inspection and reproduction may be purchased for 30 cents a sheet.

Defensive Publication applications have not been examined as to the merits of alleged invention. The Patent and Trademark Office makes no assertion as to the novelty of the disclosed subject matter.

1 Sheet Drawing, 6 Pages Specification

In a voltage regulating system, a plurality of voltage sensing circuits are provided to control a voltage generated by an alternator at a predetermined value even when one of the sensing circuits is disconnected or disordered, thus preventing a battery from being over charged perfectly.
