(54) Title: METHOD AND APPARATUS FOR PROVIDING AN AUXILIARY MEDIA IN A DIGITAL CINEMA COMPOSITION PLAYLIST

(57) Abstract: The embodiments of the present invention are directed towards creating, packaging, distributing, and reproducing auxiliary media tracks (545-560), such as a second language audio track, within a digital mastering and distribution system (100, 200, 400) for motion pictures, such as that used in Digital Cinema. The invention appends data structures and elements (540, 560) to the current existing management structure (500) for representing digital cinema presentations maintaining complete interoperability and causing minimal impact to the existing structure (500) while providing an enhanced service and experience to movie audience.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *&* document member of the same patent family
