(54) Title: METHOD OF MAKING A REDUCED FAT CHOCOLATE CONFECTIONERY PRODUCT

(57) Abstract: A method for creating a reduced fat confectionery product is disclosed. The method includes providing a mixture of a chocolate compatible fat and a sweetener, thereafter refining the mixture to form a powder having a predetermined average particle size, thereafter agitating the refined powder mixture at a temperature above the melting temperature of the chocolate compatible fat to form a dough and thereafter solidifying the dough to form a confectionery product having a total formulated fat content of less than 29% by weight.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
