54 Method and apparatus for sealing welded seams of automobiles.

57 The invention relates to a system for applying sealant material to the welded seams of an automobile body (12). The apparatus of the invention includes a reciprocating piston pump (14) for supplying the material (16) under pressure from a reservoir (18) to an overhead distribution manifold (20). From a manifold (20) the material (16) is supplied to a plurality of extrusion guns (24) through drop lines (22), each of which includes a volumetric metering gear pump (30) for maintaining a constant flow rate to said guns (24) irrespective of pressure changes which may occur in the distribution manifold (20).
