(54) Title: DIRECTIONAL AUDIBLE PROMPTING FOR A DESTINATION DISPATCHING ELEVATOR SYSTEM

(57) Abstract: An elevator system (20) utilizes a destination dispatching technique. A destination entry device (26) includes a passenger interface (50) that facilitates interaction between a visually impaired passenger and the elevator system. In a disclosed example, the passenger interface (50) includes an input portion (54) that allows an individual to enter their desired destination. An output portion (58) includes the ability to provide an audible indication of directions for proceeding from the passenger interface to an assigned elevator car. Example instructions include direction and distance information for proceeding to the assigned elevator car.

INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER
IPC: B66B 1/34 (2006.01)
USPC: 187/391
According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED
Minimum documentation searched (classification system followed by classification symbols)
U.S.: 187/391

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

☐ Further documents are listed in the continuation of Box C. ☐ See patent family annex.

* Special categories of cited documents:
  "A" document defining the general state of the art which is not considered to be of particular relevance
  "E" earlier application or patent published on or before the international filing date
  "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
  "O" document referring to oral disclosure, use, exhibition or other means
  "P" document published prior to the international filing date but later than the priority date claimed
  "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
  "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
  "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
  "A" document member of the same patent family
