(54) Title: SYSTEM AND METHOD FOR UTILIZING PROFILE INFORMATION

(57) Abstract: The present invention provides a system and method for utilizing profile information to set and maintain general and application settings. In architecture, the system includes a computer device for performing the operation. The computer device comprises an operation module that determines an operation type and a setting module that determines the set of setting to perform the operation on the computer device. Moreover, the computer device further comprises an acquisition module that acquires the set of setting to perform the operation on the computer device. The present invention can also be viewed as a method for utilizing profile information to set and maintain general and application settings. The method operates by (1) determining the operation on the computer device; (2) determining the set of setting to perform the operation on the computer device; and (3) acquiring the set of setting to perform the operation on the computer device.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
