(54) Title: DATA STRUCTURES FOR CONTEXT BASED RULE APPLICATION

(57) Abstract: In one particular embodiment, the disclosure is directed to a system that includes a processor, a database accessible to the processor, and storage media. The database includes a relationship table identifying a relationship of at least one pair of medical findings. The storage media stores instructions operable to direct the processor to retrieve the relationship of the at least one pair of medical findings and instructions operable to direct the processor to generate graphical user interface data based on the relationship.
