FIG. 1 is a perspective illustrating my new design for a loader tire, it being understood that the tread pattern continues as shown throughout the circumference of the tire and that the sidewall opposite to the one shown is the same except for the lug depressions;
FIG. 2 is a fragmentary view of the loader tire showing my new design in plan; and
FIG. 3 is a cross-section through the loader tire along line III—III of FIG. 2 further showing additional detail of my design.
I claim:
The ornamental design for a loader tire, substantially as shown and described.
