(54) Title: RECONFIGURATION OF CONTENT FOR DISPLAY ON DEVICES OF DIFFERENT TYPES

(57) Abstract: In one embodiment, the disclosed system and method provide for reconfiguration of source content by manipulating the source content from top to bottom and from right to left. Elements of the source content that are not commonly supported among a wide array of devices and formats, as well as spacer images, are filtered from the source content. Table data is reconfigured by copying the table content and replacing the table cells with line breaks (310). Further, if the source content is larger than a predetermined size (315), a reconfiguration application divides the source content into sub-documents (317), each sub-document having a size smaller or equal to the threshold size. Individual sub-documents may include a link to another one of the sub-documents. By reconfiguring the source content, the source content may be transmitted to and displayed at any of a wide variety of devices.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
