Isaac W Averill of Plymouth Michigan for
Letters Patent

The Schedule referred to in these Letters Patent and making part of the same containing a description in the words of the said Isaac Averill himself of his improvement in the Garden Hoe.

To all to whom these presents shall come. Be it known that I Isaac W Averill of the Town of Plymouth in the County of Wayne in the Territory of Michigan. have invented a new and useful improvement in the Garden Hoe. and the following is a full and exact description thereof.

The Shape and figure of said Hoe upon one side exactly corresponds with that of one side of the Indian flint or Buffaloe Spear. from which it was taken and the other side flat or concave. being from four to six inches long in the blade. crate, immediately from edges. with a rib running through the center lengthwise upon the back for support. thence a shank is turned little within the right angle with a hole in it to fasten into the handle. To be made of Steel or iron, either wrought or cast as best suits the operator. What I claim as my improvement is its peculiar conformity to the Indian flint
