(54) Title: CUSTOMIZABLE ON-SCREEN DISPLAY FOR DATA PRESENTATION

(57) Abstract: An outcome prediction system viewed on a monitor. A system in accordance with the present invention comprises a plurality of contests, each contest having at least two outcomes, wherein a screen presented on the monitor allows for selection of one of the at least two outcomes for each of the contests in the plurality of contests, a scoring system, displayed on the monitor and coupled to the screen displaying the plurality of contests, the scoring system providing a first moniker indicating that a selected outcome was correct and a second moniker indicating that the selected outcome was incorrect, wherein the scoring system counts a number of first monikers and a number of second monikers and provides a total number of first monikers, and a navigation bar; displayed on the monitor, to allow for viewing of a broadcast program on the monitor, wherein the broadcast program is related to at least one of the plurality of contests.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
