(54) Title: SYSTEM AND METHOD FOR CAROUSEL CONTEXT SWITCHING

FIG. 2

(57) Abstract: Content filter panels are provided in a user interface of an application for browsing and viewing media content. The content filter panels each contain at least one selectable filter for filtering media content items. A direction of movement of a navigation indicator within an active content filter panel is determined, with the navigation indicator being controlled by a user. Based on a determination of a movement direction of the navigation indicator in a first axis, the active content filter panel is switched from a first content filter panel to a second content filter panel. Based on a determination of a movement direction of the navigation indicator in a second axis, the media content items are filtered according to a selectable filter of the active content filter panel selected by the navigation indicator. A filtered media content item is caused to be displayed in the user interface.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
