(54) Title: PHARMACEUTICAL COMPOSITIONS COMPRISING NANO SIZE DROPLETS OF SKIN WHITENING AGENTS

(57) Abstract: The present invention relates to pharmaceutical compositions comprising mono size droplets of skin whitening agents or salts thereof. In particular, the present invention relates to a stable pharmaceutical composition comprising skin whitening agents or salts thereof along with other pharmaceutically acceptable excipients which possess substantially improved skin whitening effects and also exhibits greater skin permeability. The invention also relates to processes for the preparation of such compositions.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
