UNITED STATES PATENT OFFICE

WILLIAM HOPPER, OF OLD KILPATRICK, SCOTLAND, ASSIGNOR TO THE SINGER MANUFACTURING COMPANY, OF ELIZABETH, NEW JERSEY, A CORPORATION OF NEW JERSEY

DESIGN FOR A SEWING MACHINE FRAME

Application filed July 18, 1931, Serial No. 40,588, and in Great Britain March 18, 1931. Term of patent 14 years.

To all whom it may concern:

Be it known that I, WILLIAM HOPPER, a subject of the King of Great Britain, residing at 4 Dalnottar Drive, Old Kilpatrick, Dumbartonshire, Scotland, have invented a new, original, and ornamental Design for Sewing Machine Frames, of which the following is a specification, reference being had to the accompanying drawing, forming part thereof.

The figure is a perspective view of a sewing machine frame, showing my new design.

The opposite side of the bracket arm is ornamented at its free end in the same manner as the side illustrated. The ornamentation at the bend of the bracket arm is omitted on the side not illustrated which is formed at this location with the conventional circular opening for access to the working parts within the bracket arm.

I claim:

The ornamental design for a sewing machine frame, as shown and described.

WILLIAM HOPPER.
