UNITED STATES PATENT OFFICE.

WENDELIN SENG, OF CHICAGO, ILLINOIS.

IMPROVEMENT IN EXTENSION-HINGES FOR LOUNGES.

Specification forming part of Letters Patent No. **147,869**, dated February 24, 1874; application filed August 19, 1873.

CASE B.

To all whom it may concern:

Be it known that I, WENDELIN SENG, of Chicago, in the county of Cook and State of Illinois, have invented an Improvement in Extension Lounge-Hinges, of which the following is a specification:

The nature of the present invention consists in an extension lounge-hinge, which is provided with lock-stops on the wings to prevent them from extending when the lounge is closed, as hereinafter fully described and shown.

In the drawing, Figure 1 is a perspective representation of the improved extension-hinge as used when the lounge is open; Fig. 2, a transverse section of the lounge closed, with hinge in position as when the lock-stops prevent an extension of the wings of the hinge.

B represents the jointed wing of the hinge, which is provided with a tongue, C, to slide on the wing A, which is slotted out at F to receive a guide-pin, E, which holds the tongue C in place. The device, so far, is not claimed to be new, it having been claimed before; but the lock-stop G, attached to and projecting

out from the wing B, and the stop H, attached to and projecting up from the wing A, are new, and make the extension-hinge practicable, as shown by the operation.

The wing B is attached to the lower or stationary part T, and the wing A attached to the folding or upper part S of the lounge, as shown at Fig. 1, so that when the folded part is closed, as shown in Fig. 2, the stop G locks over stop H, and this prevents the tongue C from sliding on the wing A, and from tearing the cloth V, which conceals the joint at the front of the lounge. When there are no locks, the folding part S has a constant lateral movement on the tongue C; hence the importance of the locks.

I do not claim the extension-hinge alone; but

What I do claim is—

The extension lounge-hinge A B C, provided with the lock-stops G H, as set forth.

Witnesses: WENDELIN SENG.
