(54) Title: GRAPHICAL USER INTERFACE FOR MANAGING VOICE MESSAGES

(57) Abstract: A method and system for managing messages including voice messages in a graphical user interface. One example system includes a database configured to store messages having voice messages associated therewith. The system includes a graphical user interface comprising an inbox display configured to graphically display at least a portion of the messages. The inbox display includes at least one play icon that, when selected by a user, plays a selected voice message directly within the graphical user interface. The inbox display further allows the user to manage the messages and to control playback of the voice messages directly within the graphical user interface.
