Patent Number: Des. 411,691
Date of Patent: ** Jun. 29, 1999

Claim

The ornamental design for a surface configuration of moveable seat, as shown and described.

Description

FIG. 1 is a front elevational view of a surface configuration of moveable seat according to our novel design;

FIG. 2 is a top view of a surface configuration of moveable seat according to our novel design;

FIG. 3 is a left side view of a surface configuration of moveable seat according to our novel design, the right side view being mirror symmetrical;

FIG. 4 is a perspective view from the front left of a surface configuration of moveable seat according to our novel design, the perspective view from the front right being mirror symmetrical;

FIG. 5 is a perspective view from the front left of a surface configuration of moveable seat according to our novel design, depicting the seat in a reclined position, the perspective view from the front right being mirror symmetrical; and,

FIG. 6 is a perspective view from the front left of a surface configuration of moveable seat according to our novel design depicting the seat in a reclined position and the lower portion of the seat extended, the front right being mirror symmetrical.

The bottom and rear portions of the seat are not part of the claimed design. Also, the dash line included depicts environment and is not part of the claimed design.
