(54) Title: SYSTEM FOR POWER LINE COMMUNICATION

(57) Abstract: The present invention relates to a system for power line communication that comprises: a plurality of measuring units (4), a plurality of concentrators (3) and a central processing unit (1). Each of the plurality of measuring units (4) communicates measurement data to the central processing unit (1) via one of the plurality of concentrators (3) and communication between a measuring unit and a concentrator is carried out via the power line. In addition, each measuring unit (4) selects which concentrator (3) it communicates via out of the plurality of concentrators (3) and each concentrator (3) selects the communication parameters with which the measuring unit and the respective concentrator communicate.

International application No.

PCT/SE2007/000558

#### A. CLASSIFICATION OF SUBJECT MATTER

IPC: see extra sheet
According to International Patent Classification (IPC) or to both national classification and IPC

### **B. FIELDS SEARCHED**

Minimum documentation searched (classification system followed by classification symbols)

### G01D, G01R, H02J

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

## SE,DK,FI,NO classes as above

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

## EPO-INTERNAL, WPI DATA, PAJ

#### C. DOCUMENTS CONSIDERED TO BE RELEVANT

X See patent family annex.

- Special categories of cited documents:
- "A" document defining the general state of the art which is not considered to be of particular relevance
- earlier application or patent but published on or after the international filing date
- document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- document referring to an oral disclosure, use, exhibition or other means
- document published prior to the international filing date but later than the priority date claimed
- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
