Abstract: Compositions comprising metabolized conditioned growth medium and/or metabolized cell extract and methods of use are described. The metabolized conditioned growth medium and metabolized cell extract compositions may be formulated with an acceptable carrier into injectable or topical formulations, for example, as a cream, lotion or gel, and may be used in cosmeceutical or pharmaceutical applications. The metabolized conditioned growth medium and metabolized cell extract may also be further processed to concentrate or reduce one or more factors or components contained within the metabolized conditioned growth medium or metabolized cell extract. The growth medium may be conditioned by any eukaryotic cell. The metabolized conditioned growth medium and metabolized cell extract may be used to prevent or treat a condition, for example, a skin condition.
