(54) Title: ION CHANNEL MODULATORS AND METHODS OF USE

(57) Abstract: In general, the invention relates to compounds useful as ion channel modulators. It has now been found that compounds of this invention, and pharmaceutically acceptable compositions thereof, are useful as inhibitors of voltage-gated sodium channels.

INTERNATIONAL SEARCH REPORT

International application No.
PCT/US2008/064314

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
Although claims 44–48 are directed to a method of treatment of the human/animal body, the search has been carried out and based on the alleged effects of the compounds.
2. Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. As all searchable claims could be searched without effort justifying an additional fees, this Authority did not invite payment of additional fees.
3. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee.
- The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation.
- No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: Claim 1 (part), 2-19, 25-37 (part), 38, 40-48 (part)

Compounds of formula I wherein R'1 and R1 are independently -Z-R4, compounds of Formula Ia, pharmaceutical composition thereof and use of said compounds in therapeutic methods

2. claims: Claim 1 (part), 20-24, 25-37 (part), 39, 40-48 (part)

Compounds of formula I wherein R'1 and R1 together with the nitrogen atom to which they are attached form an optionally substituted heterocycloaliphatic, Compounds of formula Ib, pharmaceutical compositions thereof and use of said compounds in therapeutic methods.
