I. C. Howard,

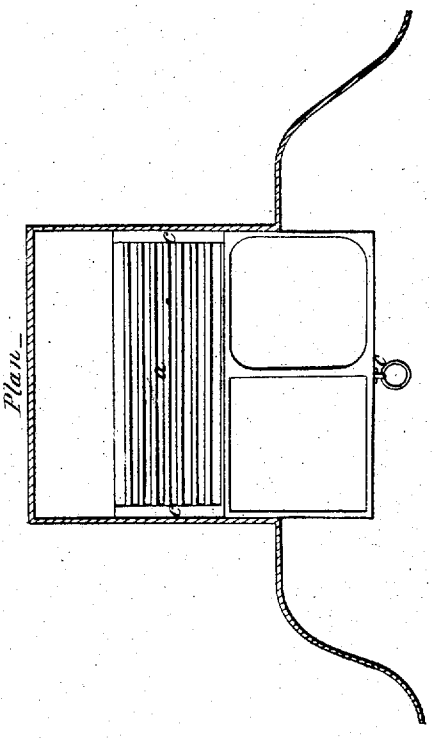

Fire Place.

Patented Oct. 27. 1835.

Front.

John Howard
Letters Patent (Patented October 27 1835

The schedule referred to in these Letters Patent and making part of the same containing a description in the words of the said John Howard himself of his improvement in the Fire place for cooking and Baking.

To all whom these Presents shall come. Be it known that I. John Howard of Hampton in the County of Windham & State of Connecticut have invented a new & useful Draw for baking & boiling & that the following is a full and exact description thereof. First. A Grating set in the back of the Chimney eighteen inches or more in length across the Chimney Back. Second. 3 inches or more from the front of the grate to the back of the same. Third. Eight inches or more from the top of the grate to the botom of the same to admit S.d draw. Fourth. Two inches space under the grating & on the backe of the S.d grating sufficient room to admit the guides of S.d Draw when shut. Fifth. S.d Grating is of cast Iron. Sixth. S.d draw is made of Sheet or cast iron or Copper, Eighteen inches or more in length. Ten inches or more in wealth, Eight inches or more deepe with a half hoop on the fruint of S.d Draw. two & one half inches deepe on the lower edge of S.d draw, with Iron guides on the ends running in a groove in the cast grating extending back of S.d Draw, six inches or more to holde the draw while cooking with a cover Seven inch or more hoop on the back side of S.d draw. Shutting within S.d draw to holde coles to condense & bake on the Tope as well as the botom. Seventhly. S.d Draw is furnished with Borders & Bake pans. That boiling and baking can be don at the same time in S.d Draw.

What I claim as my own invention and not previously known in the above described Machine. is a draw hoping on grate into the chimney back, boiling and baking with the ovein-
