

ABSTRACT

“INTEGRATED MANUFACTURING AND TEST PROCESS PLATFORM”

The present specification provides a novel process platform that replaces paper-based work instructions and data collection used for manufacturing products. Specifically, the present specification provides a method and platform for performing automated testing of a product being manufactured. The process platform of the present invention may be deployed at multiple locations and be integrated with existing quality control systems. The process platform includes a plurality of pre-defined instructions and is programmed to execute these instructions automatically at different stages for performing desired quality checks on the product being manufactured at multiple manufacturing stages.
