(54) **Elevator alarm and management system**

(57) The present invention refers to an elevator alarm system, of the type comprising a central unit for alarm management and an alarm activation device provided with handsfree unit, in which the central unit is designed to be connected by telephone with a remote control station, characterised in that the alarm management central

unit is provided with an internal modem and interfaced with the electronic board responsible for the elevator general management, in such a way that the operators of the remote station may interact with the alarm management central unit and with the electronic board for general elevator management purposes.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 06 42 5397

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
