UNITED STATES PATENT OFFICE.

DAVID D. BUICK, OF DETROIT, MICHIGAN.

DESIGN FOR A BATH-TUB RIM.

SPECIFICATION forming part of Design No. 27,487, dated August 3, 1897.

Application filed April 21, 1897. Serial No. 633,187. Term of patent 14 years.

To all whom it may concern:

Be it known that I, DAVID D. BUICK, a citizen of the United States, residing at Detroit, in the county of Wayne and State of Michigan, have invented and produced a new and original Design for Bath-Tub Rims, of which the following is a specification, reference being had therein to the accompanying drawings, in which—

10 Figure 1 is a plan of a bath-tub rim embodying my design. Fig. 2 is an edge elevation thereof.

15 The rim in general outline is oblong, having the straight sides A, connected at one end by the rounded end portion B. At the opposite end the sides extend out beyond a rounded end C and form at the points of joinder of this end with the sides A the enlargements or

lobe-shaped portions D, which, with the end portion C, when viewed cursorily, gives the rim the appearance of having a square end. On each enlargement is the shell-shaped concave ornament E.

The leading feature of the design is the rim of substantially oblong shape having the straight sides, rounded ends, and the enlargements at one end in line with the sides.

What I claim as my invention is—

The design for a bath-tub rim, substantially as herein described and shown.

In testimony whereof I affix my signature in presence of two witnesses.

DAVID D. BUICK.
