(54) Title: HEAT EXCHANGE DEVICE IN PARTICULAR FOR SOLAR COLLECTOR

FIG. 1

(57) Abstract: Comprised in a heat exchange device (1) are a substantially plate- like body (2) having an inner cavity (3) suitable to contain a fluid (50), and also having a first wall (6) and a second wall (7). The inner cavity (3) is mainly extended along a de-
velopment plane (P) substantially parallel to the first (6) and second (7) wall. The body (2) of such device (1) further comprises,
between the first (6) and the second wall (7), a plurality of connection portions (9, 10) such to define a plurality of paths for the
fluid (50) between at least one inlet duct (4) and at least one outlet duct (5), within the inner cavity (3).

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
