Nes. 455

Apollos Richmond of Providence R. I.
assignor to
A. C. Barstow & Co of same place,
Letters Patent No 455. Dated May 11. 1852

The schedule referred to in these Letters Patent and making part of the same.

To all Persons to whom these Presents shall come.

Be it known that
I Apollos Richmond of Providence in the County of Providence and State of Rhode Island.

have produced a new and original design for the front side and back plates of a cooking stove and I hereby declare that the following description taken in connection with the accompanying drawings hereinafter referred to, forms a full and exact specification of the same.

The figures of the accompanying plate of drawings represent my new design. In plate 1 fig 1 is an elevation of the front plate. In plate 2 fig 2 is an elevation of the side plate and fig 3 a vertical section of the same taken in the plane of the line A B. In plate 3 fig. 4 is an elevation of the back plate.

The lower doors of the front plate fig 1. pl. 1. have around them the mouldings a. a &c - b. b &c between which is the vine and flower work C. C. In the centre of the door is the sheaf d. d enclosed by the mouldings b. b. The upper doors are ornamented with the mouldings a. a. flower work C. C. and elongated panels e. e. formed by the raised moulding f. f.

The side plate is ornamented on the top with the raised arches g. g &c pendants h. h. and sheafs i. i. i. and on the bottom with the prism shaped pieces K. K. &c. The two small doors are ornamented with the mouldings a. a. and b. b. vine work c. c. and sheafs d. d. The oven door has around it the mouldings a. a. and vine work c. c. and has in the centre panel the large sheaf l. l. surrounded by the raised arch m. m. Under the sheaf l. l. is the raised work n. n. composed of scalloped work and mouldings of the shape shown in fig 2 plate 2.

The top and bottom of the back plate is ornamented in the same manner as the side plate with the arches g. g. &c while the panels are composed of the mouldings a. a and b. b. and the vine work c. c.

Having thus described my new design I shall state my claim as follows.

What I claim as my production and desire to have secured to me by Letters Patent is the new design consisting of the ornamental sheaf work vine and flower work, &c herein above described and represented in the drawings for the front side and back plates of a cooking stove.
