Flower ornamental assembly

A flower ornamental assembly (1) for accommodating a flowerpot (8) including a support post (2) having the lower part buried in the ground (G) and erected upward from the ground level (GL), a flower ornament pot (3) having a through-hole (3b) for penetrating the support post (2), and a filler (4) filling up the surrounding of the support post (2) inserted into the flower ornament pot (3). A flowerpot (8) is accommodated in an opening (3a) at the upper end of the flower ornament pot (3). The flower ornament pot (3) is erected and supported by the support post (2) and the filler (4), so that it can be prevented from sway or tilt. Since the entire structure of the flower ornament pot (3) is exposed above the ground (G), the appearance of the flower ornamental assembly (1) is enhanced.

The present search report has been drawn up for all claims.

Place of search: The Hague  
Date of completion of the search: 6 July 2004  
Examiner: Caldentey Pozo, F

**CATEGORY OF CITED DOCUMENTS**
- X: particularly relevant if taken alone  
- Y: particularly relevant if combined with another document of the same category  
- A: technological background  
- O: non-written disclosure  
- P: intermediate document  
- T: theory or principle underlying the invention  
- E: earlier patent document, but published on, or after the filing date  
- D: document cited in the application  
- L: document cited for other reasons  
- #: member of the same patent family, corresponding document
This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
