UNITED STATES PATENT OFFICE.

JESSE S. MALIN, ISAIAH D. WIEST, AND JONAS H. WIEST, OF PORTLAND,
INDIANA.

GAME FOR AMUSEMENT.

SPECIFICATION forming part of Letters Patent No. 482,747, dated September 20, 1892.

Application filed February 1, 1892. Serial No. 420,019. (No model.)

To all whom it may concern:

Be it known that we, JESSE S. MALIN, ISAIAH D. WIEST, and JONAS H. WIEST, citizens of the United States, residing at Portland, Jay
5 county, State of Indiana, have invented a new Game entitled "The Electoral College Game," of which the following is a specification.

Our invention is an improvement in games, in its object combining amusement and in-
10 formation, arranged in an attractive manner on a board eighteen inches square, of which the following is a detailed description: In the center of the board is placed a revolving indicator *a*. Around the circle in which it spins
15 is arranged a circle containing the names of all the States of the Union *b*, at the head of which is placed the electoral vote for each State *c*, and marked by a star *d*, in which there is a perforation or pin-hole *e*. At each
20 spin of the indicator the State pointed out is secured by placing a small pin in the perforated star *d*, there to remain until all the States have been chosen or voted. The two spirals
25 *ff*, beginning on opposite sides of the board at starting-point *g g*, (in different colors,) wind to the right twice around the board, in each of which there are two hundred and
30 two hundred and twenty-three, representing a majority of the electoral vote in each spiral, in which is kept a running count of the votes as pointed out by the indicator. The player

first securing a majority of the electoral vote lands his candidate (which is represented by 35 the pin used in the count) in the White House *i i*.

The foregoing describes our invention.

What we claim, and desire to secure by Letters Patent, is—

1. The game apparatus herein described, 40 consisting of a board having thereon a revolving indicator surrounded by a circular arrangement of the names of all the States, with their respective number of electoral 45 votes, a circle of perforated stars, in which to peg off, opposite the name of each State, the number of the electoral vote for each State as it is counted, so that it may not be again counted in adding up the total in one game, 50 in connection with the two perforated spirals, in which is kept the count of the game, as specified.

2. The game apparatus herein described, 55 comprising the indicator *a*, the circle containing the names of all the States *b*, with their respective number of electoral votes, the circle of perforated stars *d*, and the two spirals *ff*, all substantially as set forth.

JESSE S. MALIN.
ISAIAH D. WIEST.
JONAS H. WIEST.
