(54) Title: INTERACTIVE BROADCAST SYSTEM AND METHOD

(57) Abstract: The present invention provides a system and method for providing an interactive broadcast of a video or TV content. The system preferably comprises means for displaying the content, an input device for receiving user inputs from a viewer, processing means for executing a computer program capable of marking candidate areas in images displayed by said display means, for processing inputs received from said viewer, and for providing indications responsive to said inputs, and an application server for broadcasting said content, said application server comprises means for indicating location(s) of key features within displayed images of said content, wherein said user inputs are predictions relating to said key features and said responsive indications indicate whether said predictions match said key features
