UNITED STATES PATENT OFFICE.

BLANCHE BONESTELL, OF NEW YORK, N. Y., ASSIGNOR TO HUYLER'S, OF NEW YORK, N. Y., A CORPORATION OF NEW YORK.

CANDY-PACKAGE.

1,390,667.

Specification of Letters Patent. Patented Sept. 13, 1921.

Application filed November 26, 1920. Serial No. 426,352.

To all whom it may concern:

Be it known that I, BLANCHE BONESTELL, a citizen of the United States of America, residing at New York, in the county and State of New York, have invented new and useful Improvements in Candy-Packages, of which the following is a specification.

My invention relates to a package for candy combining with it the characteristics of a doll. The principal object of the invention is to provide a simple form of doll, consisting of but little more than a decorated sheet of cardboard, and to suitably associate therewith simple means for carrying the candy.

My invention consists in the construction, combination and arrangement of parts herein described, and claimed, and illustrated in the accompanying drawings.

In these drawings, in which similar reference characters designate corresponding parts in all views, I have illustrated a preferred embodiment of my invention, and—

Figure 1 is a perspective view of the doll candy package viewed approximately from the front;

Fig. 2 is a side elevation of the doll candy package shown in Fig. 1; and

Fig. 3 is a section taken approximately on the line 3—3 of Fig. 1.

Referring to the drawings, the package comprises a representation of a doll consisting preferably of a pair of sheets 1, 2, of cardboard or similar material cut to shape and decorated with a head 3, arms 4 and skirt 5, the sheet 1 representing the front and the sheet 2 the back of the doll. These sheets or boards may be secured together, preferably by a ribbon 6, which is tied in a bow and serves also as the doll's hair ribbon, and by ribbons or other form of wristlets 7 tied about the wrist portions of the two sheets. Below the waist, the front and back portions of the skirt 5, designated 9 and 10 respectively, are preferably left free so that they may be separated.

The main candy carrying portion of the package comprises a bag 11, preferably of a light network material rendering the contents visible, which is supported between the front and back portions of the skirt upon cords or ribbons 12, 13. The skirt portions 9, 10, readily spread to accommodate the bag of candy when filled, but may, if de-

sired, be separate pieces from the parts representing the upper part of the body, and may be hingedly connected thereto at the waist.

In the preferred construction illustrated, the front and back boards 1, 2, are in one piece, and the cords 12, 13, pass through loops 14 in the back boards forward through loops 15 in the forward boards and thence back under the arms, being tied together at 16 behind the doll, with sufficient length of cord so that the doll may be hung up for display by this means. This arrangement is such that when the cords 12, 13, are pulled at the back, or when the doll is hung up on display, the cords are drawn through the loops 14, 15, sufficiently to draw the front and back boards 1, 2, together as close as the filled candy bag will permit; but when the cords are released at the back, the boards 1, 2, may be readily separated for access to the candy.

One or both of the loops 15 may be concealed if desired, by a decorative bow, as at 8; and other decorative matter may be used as desired, such as the pocket 17, paper lace fringe 18, and the like.

The doll is preferably provided with legs 19 movably attached to the body portion, as to the back cardboard 2, and these legs may, if desired, be made of netting and used as additional candy containers, being particularly adapted to contain and display candy sticks.

Having now described my invention, I claim and desire to secure by Letters Patent:

1. A candy package, comprising front and back boards cut and decorated to represent a doll, a candy container arranged between said boards approximately at the waist of the doll, and means for holding said front and back boards together at the upper part and supporting the said container.

2. A candy package, comprising front and back boards cut and decorated to represent a doll, means holding said front and back boards together at the upper part, a candy container suspended between said boards approximately at the waist of the doll, and cords slidably associated with said boards at the waist and arranged to draw the boards together, or release them for access to the container.

3. A candy package, comprising front and back boards cut and decorated to represent a doll, means holding said boards together at the upper part, a candy container
5 disposed between said boards, means for suspending the doll for display purposes, and means associated with said suspending means for drawing the boards together to prevent access to the container when the
10 doll is suspended.

4. A candy package, comprising front and back boards cut and decorated to represent a doll, means holding said boards together at the upper part, a candy container
15 disposed between said boards, and cords slidably associated with said boards for drawing them together, and arranged for suspending the doll.

5. A candy package, comprising front
20 and back boards cut and decorated to represent a doll, and provided with loops at the waist portion, means holding said boards together at the upper part, cords passing through said loops and arranged to sus-
25 pend the doll, and a candy container supported by said cords and disposed between the front and back boards.

6. A candy package, comprising front and back boards cut and decorated to represent a doll and provided with loops at the
30 waist portion, means holding said boards together at the upper part, cords passing through said loops and arranged to suspend the doll, and a candy container supported
35 by said cords and disposed between the front and back boards, the arrangement of said cords being such that on suspending

the doll the cords draw the boards together to prevent access to the container.

7. A candy package, comprising front
40 and back boards cut and decorated to represent a doll and provided with loops at the sides of the waist portions, means holding said boards together at the upper part, and a pair of cords arranged between the
45 boards and having their ends passed through the loops on the back board, thence through the loops on the front board, thence back of the back board and tied.

8. A candy package, comprising front
50 and back boards cut and decorated to represent a doll and provided with loops at the sides of the waist portions, means holding said boards together at the upper part, a pair of cords arranged between the
55 boards and having their ends passed through the loops on the back board, thence through the loops on the front board, thence back of the back board and tied, and a candy container disposed between said
60 boards and suspended from said cords.

9. A candy package, comprising front and back boards cut and decorated to represent the head, arms, body, and skirt of a
65 doll, a candy container disposed between the skirt portions of the doll, means holding said boards together at the upper part and also supporting said container, and supplementary containers adapted for stick candy
70 suspended to represent the doll's legs.

In testimony whereof I have signed my name to this specification.

BLANCHE BONESTELL.
